

JOSÉ ORTEGA

FRONT-END DEVELOPER

ABOUT MYSELF

I am a creative and efficient person, looking for new challenges and learning opportunities.

I want to advance in my programming career with new and bigger projects, I love programming in the front-end and learn about this field.

STUDIES

Facultad de ciencias exactas, físicas y naturales

Tecnicatura en Programación Web

Colegio Maria Auxiliadora

Bachiller en Ciencias Naturales

WORK EXPERIENCE

E-commerce

E-commerce made it with React, Sass and Rakutens(API)

I made a simple e-commerce, this has simple functionalities like show products and a simple cart. You can't pay the products. The products information comes from an API with all information like the price and the name of these ones.

Eddie homepage

Devchallenge number 7 (made it with HTML, CSS and JavaScript)

I chose this challenge because it is like a real life work., devchallenge.io gave me a design in Figma and I made the page pixel perfect. It is a simple homepage.

Weather App

A weather app with React and Sass

I made a simple weather app with an API (OpenWeather), this one shows you the weather of any city in this API. You can search it in the search bar.
