WORK EXPERIENCE

E-commerce

E-commerce made it with React, Sass and Rakutens(API)

I made an simple ecommerce, this have simple functionalities like show products and a simple cart. you cant pay the products. The products information come from an api with all information like the price and the name of this ones.

Eddie homepage

Devchallenche number 7 (made it with html,css and javascript)

I choose this challenge because is like a real life work., devchallenge.io give me a design in figma and i made the page pixel perfect. Is a simple homepage.

Wheather App

A wheather app with React and Sass

I made a simple weather app With an API(openWheather), this one shows you the wheather of any city in this api. You can search it in the search bar.
